Mateusz Bogacz – Drewniak

IT Specialist / Software Developer / DevOps Enthusiast

ABOUT ME

Student informatyki z pasją do Linuxa, DevOps i programowania. Chętnie rozwijam swoje umiejętności w administracji systemami i automatyzacji IT.

EDUCATION

WITELON COLLEGIUM STATE UNIVERSITY (2023-2027)

Computer Science

Engineering studies in Computer Science, specialization in Mobile and Web Application Development

Zespół Szkół w Strzegomiu (2018-2022)

Technical Secondary School in Computer Science

Graduate of Computer Science with outstanding results in professional qualification exams.

Work

Intern Developer in .NET
SOFTIQ sp. z o.o., Legnica branch

(July - August 2025)

- Built web applications with Blazor and .NET 8
- Designed application architecture and configured MS SQL Express using Entity Framework
- Implemented authentication and registration via ASP.NET Identity
- Developed reusable Blazor components and templates
- Designed and implemented logic for project and subproject management in a project estimation and cost calculation system

Intern Help-Desk
Drozapol-Profil S.A.

(July - September 2024)

- Managed Windows and Linux servers
- Provided technical support and maintained IT infrastructure
- Used Zabbix and Proxmox for monitoring and virtualization; managed VoIP network
- Assisted in deploying Ansible (YAML, PowerShell) and Wazuh for automation and security monitoring
- Automated software updates via Chocolatey
- Deployed RustDesk remote assistance system

Intern Help-Desk
Drozapol-Profil S.A.

(July - September 2023)

- Familiarized with company workflows and office hardware operations
- Managed servers and LTO-standard storage devices
- Implemented backup strategies and fundamental cybersecurity measures
- Deployed and maintained honeypot environments

Polish: Native

It Skills

Programming & Web Development

Java, .NET (C#), Python, C++, PHP, JavaScript/ TypeScript, HTML, CSS, Bash, YAML, Blazor, Laravel, Django, Bootstrap, Tailwind CSS, DaisyUI, Web API, React, Vue.js

Operating Systems

Linux (administracja i użytkowanie), Windows (7–11, Server 2012–2022)

DevOps & Administration

Ansible, Nginx, Docker, Proxmox, Zabbix, Wazuh, Chocolatey, PowerShell, SSH, LTO, Cisco IOS, Veam, T-Pot, Active Directory, LTO, Veeam Backup

Databases

MySQL, PostgreSQL, Redis, SQLite

Other

Management of telephone switchboards, Repair and maintenance of printers, Troubleshooting and repair of computers and operating systems

Other skills

- Quick learner with the ability to adapt to new technologies
- Strong teamwork skills
- Creative and innovative problem-solving
- Good organizational and time management skills
- Ability to work under pressure in a fast-paced environment
- Effective communication and cross-department collaboration

Projects

Faily – Find a Idiot Like You

Web application for organizing events and carpooling write in Laravel, Bootstrap and Vue.js

Responsibilities:
- Dockerized the application for development and deployment
- Deployed the application online
- Developed backend functionality
- Assisted with frontend development
- Integrated user authentication, mailing, and APIs

SdWP

Group project completed during internship at Sofitq – Web application in Blazor with ASP.NET Core backend and SQL Express database, designed for managing projects and subprojects with cost estimations

Responsibilities:
- Dockerized the application for development and deployment
- Integrated with Mailpit
- Implemented user authentication system in Blazor using ASP.NET Identity
- Integrated logging with Serilog
- Assisted with Entity Framework integration
- Developed functionality for adding projects, subprojects, and related cost estimations

Car Rental

Web application for car rental management, developed in Django (backend) with Bootstrap and PostgreSQL database (reverse-engineered instead of using models.py)

Responsibilities:
- Dockerized the application for development and deployment
- Developed backend functionality, including a custom user authentication system
- Assisted with frontend development

Certificates & Courses
- **CCNA: Switching, Routing, and Wireless Essentials**
- **Python Essentials 1**

Interests

Football, Comics, Tabletop RPGs, Alternative music, Classic video games, Open-source tools, Microcomputers

Extracurricular Activities

Koło Naukowe Informatyki Współczsnej
Member of the student club at Collegium Witelona. Active in the programming section, working on game development with Unity. Currently developing the club's website using .NET and React, as well as a project based on microcontrollers and IoT development boards.

Pomoc i Nadzieja Foundation
Ambassador of the Pomoc i Nadzieja Foundation in Bydgoszcz. The foundation supports talented students in difficult situations and also assists people in need. Started as a beneficiary and now actively contributes to projects supporting academic and social development.
